S

## KEY PROJECTS AT SRIJAN

**Senior Frontend Developer, (RingConcierge) - (<https://ringconcierge.com/>)**

Ring Concierge is an e-commerce platform for leading luxury jeweler, it's developed on the Shopify technology. We developed the reusable components for streamlined UI development.

**Front End:** Shopify, Custom component, j query, HTML5, CSS3, SASS, Custom Grid system, GIT, JIRA

### Responsibilities:

- Responsible in User-facing features, build reusable code, and the technical feasibility of UI/UX designs
- Reusable components creation with variation of single code. theming the component, reusing that component as the shopify itself is intended for code reusability.
- Responsive layouts or verify accessibility and also involved in solving issues reported by customers.

**Senior Frontend Developer, (Domu) - (<https://www.domu.com/>)**

Domu is a leading provider of rented apartments in Chicago, proudly holding the title of the largest apartment listing site dedicated to Chicago's rental market. The platform is built on Drupal technology, enabling us to create a seamless user interface by developing reusable components with Pattern Lab design system.

**Front End:** Drupal 10, Pattern Lab, Twig data binding, Custom component, Drupal Behavior, HTML5, CSS3, SASS, GIT, JIRA

### Responsibilities:

- Responsible in User-facing features, build reusable code, and the technical feasibility of UI/UX designs
- Reusable components creation with variation of single code. theming the component, reusing that component as the Pattern Lab itself is intended for code

reusability.

- Responsive layouts or verify accessibility and also involved in solving issues reported by customers.

### **Senior Frontend Developer, (UNDP) - (<https://design.undp.org/>)**

The UNDP Design system represents the unified user interfaces for UNDP projects. By unifying design elements into reusable components, development will simplify and accelerate the development of these digital products. (These reusable components are used to create 100+ projects for UNDP). We developed the components by the latest open source tool (**Storybook**) with Atomic Design concept for streamlined UI development, testing, and documentation.

**Front End:** Story book, React, j query, HTML5, Accessibility, CSS3, SASS, BEM coding standards, Custom Grid system, GIT, JIRA

#### **Responsibilities:**

- Responsible in User-facing features, build reusable code, and the technical feasibility of UI/UX designs
- Reusable components creation with variation of single code. theming the component, reusing that component as the storybook itself is intended for code reusability.
- Used add-ons to do things like responsive layouts or verify accessibility.
- Develop entire UIs with both RTL and LTR cases.
- Used multilingual and maintained documentation in MDX files from start to end.
- Also involved in solving issues reported by customers.
